Keep track of what's happening

Cost-allocation software for printing, copying and scanning

Keep track of what's happening

To maximise returns from your wide format systems, you need to keep track of how they're used. And make sure costs are allocated to the right users, departments and projects.

Océ Account Center makes it easy to do that. By keeping track of printing, copying and scanning, it helps you turn those costs into chargeable income.

Maximises income and ensures cost reimbursement

With Océ Account Center you can take a significant step to change your document services from costs into profits. By enabling cost allocation and reimbursement for all printing, copying and scanning jobs, it maximises income and ensures all work is charged to the appropriate user, department or project. So not only are all costs covered, but at the same time return on investment in your printing systems is significantly increased.

Controls access to your TDS wide format systems

The software enforces entry of valid account information before the system can be used. So only authorised people are able to print, copy or scan-to-file. In addition, Océ Account Center provides accurate information on system usage. Océ Account Center is designed specifically for use with one or more Océ TDS series wide format devices.

Easy operation from workstation or local control panel

Océ Account Center offers easy operation from users' workstations. Users can easily enter their account information and print to TDS devices directly from their workstations. Or for copying and scanning, they can enter account and job information at the system's front panel.
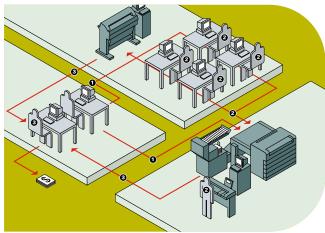

IT / Network Administration

'With all the jobs we handle, it's vital that we have a reliable way to make sure the costs are charged to where they belong'

Freely definable accounting fields and values

Océ Account Center fits in with your company's working procedures, and not the other way round. All accounting fields and values are fully customisable, so you can define them to match your company's users, departments, projects and jobs. You can also configure system behaviour freely by defining authorisation and identification requirements, remote access and administration settings and much more.

Full management information on system usage

Océ Account Center is also a source of accurate information on system usage, making it a valuable asset for workload analysis, budgeting, resource planning and other management tasks. Information can be provided the way you want it, for example per TDS device, per type of job, or per user or department.

Interfaces to third-party reporting packages

Streamlining your work to the greatest possible extent, Océ Account Center is more than just a machine-specific job counter. Thanks to its built-in interfaces to popular third-party packages, it can pass on all the data needed for accounting, billing and reporting purposes. Saving the need for time-consuming and error-prone manual data entry, and improving efficiency right through your document process.

1 Administrator defines and distributes account fields and project data base
2 Users enter correct account information when submitting jobs to local printers or central printer
3 Bookkeeper collects account data and converts to bills

Beyond the Ordinary

Printing for Professionals

Building a sustainable business has always been one of our core business principles. We do this by developing products and services that add value to the document processes of our customers, while minimizing environmental impact. And we conduct our business activities in a socially responsible manner aimed at preventing health, safety and environmental risks.

Océ Wide Format Printing Systems Partners and Awards

Océ helps the people who make our world. Companies everywhere use Océ technical documentation systems in manufacturing, architecture, engineering and construction. Each week, high speed Océ printing systems produce millions of transaction documents such as bank statements and utility bills. And in offices around the world, people use Océ professional document systems to keep the wheels of business and government turning. Océ is also at work in publishing on demand, newspaper production, document management outsourcing and wide format colour for spectacular display graphics. It all helps our professional customers go 'Beyond the Ordinary' in printing and document management.
